

Application

The RLP-1 remote light panel is equipped so that it can be integrated with a position indicator switch to signal the full-open or full-closed position of the damper. A red light signals that the damper is in the full-closed position. A green light signals that the damper is fully open.

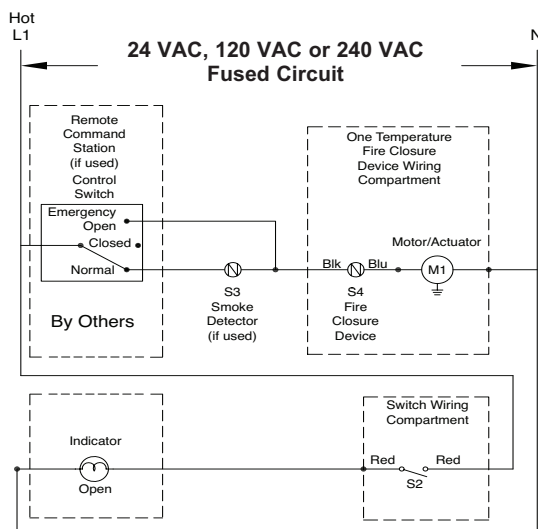

Wiring Diagram

RLP-1 with Red Indicator Light

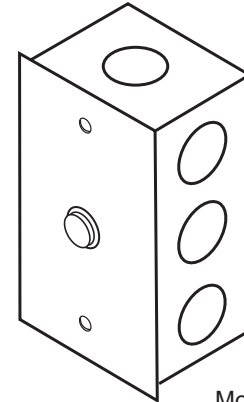

- S1** - Damper position indicator switch.
- Closes when damper is closed.
- S3** - Smoke detector or fan interlock.
- S4** - Single temperature fire closure device.

RLP-1 with Green Indicator Light

- S2** - Damper position indicator switch.
- Closes when damper is open.
- S3** - Smoke detector or fan interlock.
- S4** - Single temperature fire closure device.

Model **RLP-1**
